1 Summary

An archaeological evaluation by trial-trenching was carried out at Oxford House, Upper Holt Street, Earls Colne, Essex in advance of the construction of a new dwelling in the existing car park. Oxford House is a Grade II 15th-century listed building on a large plot with curtilage outbuildings. The evaluation trench revealed a medieval ditch aligned northwest to southeast, two modern pits, a row of four undated postholes and an undated pit. The medieval ditch may possibly have been a field boundary on the Earls Colne Priory estate.

2 Introduction (Fig 1)

This is the archive report for an archaeological evaluation by trial-trenching at Oxford House, Upper Holt Street, Essex which was carried out on 19th July 2016. The work was commissioned by Steven Belchem on behalf of Mr Richard Pascoe in advance of the construction of a detached dwelling within the existing car park of Oxford House. The work was undertaken by Colchester Archaeological Trust (CAT).

In response to consultation with Essex County Council Place Services (ECCPS), Historic Environment Advisor Teresa O'Connor advised that in order to establish the archaeological implications of this application, the applicant should be required to commission a scheme of archaeological investigation in accordance with the *National Planning Policy Framework* (DCLG 2012).

All archaeological work was carried out in accordance with a *Brief for archaeological evaluation*, detailing the required archaeological work, written by Teresa O'Connor (ECCPS 2016), and a Written Scheme of Investigation (WSI) prepared by CAT in response to the brief and agreed with ECCPS (CAT 2016).

In addition to the brief and WSI, all fieldwork and reporting was done in accordance with English Heritage's *Management of Research Projects in the Historic Environment (MoRPHE)* (English Heritage 2006), and with *Standards for field archaeology in the East of England* (EAA 14 and 24). This report mirrors standards and practices contained in the Institute for Archaeologists' *Standard and guidance for archaeological field evaluation* (ClfA 2014a) and *Standard and guidance for the collection, documentation, conservation and research of archaeological materials* (ClfA 2014b).

3 Archaeological background

The following archaeological background utilises the Essex Historic Environment Record (EHER) held at Essex County Council, County Hall, Chelmsford.

Oxford House lies within the historic core of Earls Colne (EHER 18469). Formerly known as the 'The Carved Angel', 'The Coachman Inn' and 'The George', Oxford House is a 15th century Grade II listed building on a large plot with curtilage outbuildings (NHLE no. 1337931). It is located close to the Priory, a medieval Benedictine monastery, the remains of which are a scheduled monument and the priory smithy is believed to have been located on the development site before it became 'The George'. The medieval town is thought to have grown up around the Priory and ribbon development is known to have continued along Upper Holt Street.

The building now known as Oxford House sits in a prominent position within a large plot. It has two cross-wings dating from the 15th and 17th century and has been documented as being an inn since the 17th century. Its layout will have been altered over time to adapt to the changing needs of an inn, however there is the potential for the survival of fixtures and fittings relating to the original use and evolution of the building over the centuries that it has served as an inn. An outbuilding within the curtilage of the house survives which is likely to have had a service function to the inn

and which retains a historic and architectural interest. Historic mapping depicts further outbuildings within the curtilage of the Inn that are no longer extant.

Historic England lists the building as:

House, now public house. C15, C16 and C17, altered in C18, C19 and C20. Timber framed, plastered, roofed with handmade red plain tiles. Hall range facing NE (along Lower Holt Street) with crosswings to left and right; left crosswing now oversailed by main range. Right crosswing projects to front. C19 lean-to extensions to front, and along right side. C20 extensions at rear. 2:1 window range of C18 sashes with glazing bars. C19 sashes with side-lights in front extension. Interior includes C18 fire surrounds and side-purlin roof, C15 original framing and window openings.

4 Results (Figs 2-3)

A single L-shaped trial-trench was located within the footprint of the new dwelling with the base of the L parallel and closest to the road. The trench was dug by mechanical excavator under archaeological supervision and measured 10m and 6m long by 1.8m wide (28.8m²).

Three layers were identified. Modern hardstanding and hoggin/crush (L1, c 500mm thick) sealed a layer of subsoil (L2, c 230mm thick) which sealed natural sands and gravels (L3, identified c 710mm below current ground level).

Medieval ditch F7, aligned northwest to southeast, was excavated at the south end of the trench. It measured approximately 700mm wide by 110mm deep. Post-medieval pit F1 and modern pit F3 were also excavated further to the northwest. A row of four undated postholes (F2, F5, F6 and F8) running southeast to northwest along the trench, probably from an old fence line. Posthole F5 contained a small quantity of fired clay suggesting that these post features may be of a similar date as undated pit F4 which also contained fragments of fired clay.

Photograph 2 Trench shot, looking NE

5 Finds

by Stephen Benfield

A small quantity of finds were recovered from four features (F1, F4, F5 and F7). Ditch F7 produced a small quantity of pottery of medieval date (c 11th- early 13th century). Pit F1 contained finds of early modern date (c 18th-19th century) and a single (residual) sherd of medieval greyware (dated c 13th -14th century). The finds from a pit and posthole (F4 & F5) consisted only of a few, small pieces of fired clay which are not closely dated. All of the finds are listed and described by context in Table 2 and an overall spot date for the finds from each context is also provided. The pottery fabrics referred to follow the Essex post-Roman fabric series (Cunningham 1985 & CAR 7) and are listed in Table 1. Dating of the pieces of brick ceramic building materia (CBM) recovered broadly follows Ryan (1996).

| Fabric code | Fabric name |
|-------------|---|
| 13 | Early medieval sandy wares (general) |
| 20 | Medieval sandy greywares (general) |
| 40 | Post-medieval (glazed) red earthenwares (general) |

Table 1 Pottery fabrics

| Context | Find no | Form/ description | Finds spot date |
|---------|---------|---|--------------------------|
| F1 | 1 | <p>Medieval pottery: Single sherd (12g) Fabric 20, grey sandy fabric (dated 13-14C) (residual)</p> <p>Post-medieval pottery: (3 sherds, 532g) Fabric 40 Sherds possibly all from same storage jar, arched lug handle and external and internal glaze (see CAR 7, 207) (dated 18-19 C).</p> <p>Clay pipe: Single bowl and 6 stem pieces (up to 95mm long) bowl corresponds with Crummy Type 7 dated to the late 17C (c 1670-1700) (CAR 5)</p> <p>Glass: Single sherd of green bottle glass with iridescent (degrading) surfaces (dated post-medieval)</p> <p>CBM (Brick): Three piece of brick, two (c 47mm thick) with relatively smooth surfaces, sharp edges and fine red dense fabric with occasional small stones; another similar (c 45mm thick) in hard grey/blue-grey fabric with white, sandy lime mortar on one edge (L17-E18C)</p> <p>Stone: Thin buff/cream coloured limestone piece (18-22mm thick) with chalk inclusions, relatively flat, pitted, rather coarse surfaces.</p> | Early modern (18/18-19C) |
| F4 | 4 | <p>Fired clay: (6 pieces, 36g) all from same parent piece, 3 joining producing a piece with a slightly uneven, curving surface, fine sand fabric, dark-grey interior, orange-red margins and brown-buff surface (not closely dated)</p> | |
| F5 | 2 | <p>Fired clay: Small piece (fragment) (1g) of fired clay (not closely dated)</p> | |
| F7 | 3 | <p>Medieval pottery: (4 sherds, 42g) Fabric 13, common inclusions of quartz sand, includes base and shoulder sherds from cooking pots, one sherd sooted on exterior from use as cooking vessel, exterior of sherds mainly reduced, one sherd partly reduced with red fabric core and buff/grey surface (dated 11-E13C)</p> | Medieval (11-E13C) |

Table 2 Finds by context

6 Discussion

An evaluation within the car park of Oxford House, Upper Holt Street, Earls Colne revealed a medieval ditch of 11th to early 13th century date. Medieval Earls Colne was a long, thin straggling town with two foci – the market area in the High Street in Earls Colne parish and a smaller group of houses in White Colne parish, clustered around the

triangular green (Medlycott 1999, p7). The small Benedictine priory was established between Earls Colne and White Colne in 1101-7 and is adjacent to the development site. Although there is no direct evidence, it is possible that this ditch was originally associated with the priory estate, perhaps forming a field boundary.

The only other features excavated were two modern pits, an undated row of postholes from an old fence line and an undated pit. The undated features are likely to be of a relatively modern date, and they are all probably associated with the use of the site as a rear yard to the public house which has stood on the site since the 15th century.

7 Acknowledgements

CAT thanks Steven Belchem and Richard Pascoe for commissioning and funding the work. The project was managed by C Lister, fieldwork was carried out by B Holloway and A Wade. Figures are by C Lister. The project was monitored for ECCPS by Teresa O'Connor.
